

EZ-OPEN FOOT PEDAL

FOR R/A SERIES REACH-INS

Developed with operator efficiency, sanitization, and food safety in mind, Traulsen's EZ-Open Foot Pedal makes door openings convenient while reducing the risk of spills and pathogen transfer from frequently touched surfaces. The optional feature provides the operator easy, hands-free door openings, allowing product to be securely held, and minimizing contact with potentially contaminated door handles. To open the cabinet, the operator applies pressure on the pedal with the ball of the foot...it's that simple.

KEY BENEFITS

REDUCES CROSS CONTAMINATION:

The convenience of hands-free door openings eliminates the need for employees to touch the handles, promoting a cleaner kitchen environment.

PREVENTS SPILLS:

Product and trays can be safely secured with both hands, minimizing the possibility of spills and cross-contamination.

SAVES TIME:

The EZ-Open Foot Pedal complements the standard stay-open door feature, offering timesaving convenience and ease of operation.

*The E-Z Open Foot Pedal is only available on R/A Series full height door models with at least 6" supports.
